ELEVENTH YEAR OF PUBLICATION---1930 ISSUE

FOREWORD

The Institute presents herewith the Eleventh issue of Financial Statistics—Canadian Governments. The figures given herein are comparable with those given in previous issues of the "Red Book." We believe this to be a very important feature inasmuch as it is possible, with such figures taken over a term of years, to get a good idea of the trend financial affairs are taking in any given municipality.

We have this year again combined in the first installment what used to make up the first and second installments, and that without any delay in the issue date. This has been made possible by the more prompt return of the information requested and by the co-operation of officials. The fact that information of this character is available so much earlier in the year than previously was the case, the Institute believes, speaks well for the progress being made by Canadian municipalities in accounting and reporting. In the opinion of the Institute it also has an important bearing on the regulation of financial affairs within each municipality concerned, inasmuch as the experience of the previous year is a valuable guide in working out the programme of the current year, and should therefore be at hand early in the year if the greatest benefit is to be derived from its use. The Institute is glad to be able to offer this speeding up of service to its subscribers. The information is not entirely complete in all cases, but as much of the missing data as it is possible to obtain will be sent with supplementary issues. The policy of sending to subscribers mimeographed sheets containing advance information was also continued this year.

Statistics for Quebec Municipalities with a population from 2,000-10,000 and also for the smaller urban municipalities in the Dominion will be issued as soon as complete. Much of this material is at hand at present and the Institute will be glad to supply any subscriber with any material available, upon request. If subscribers will turn to pages 33 and 38 to 42, inclusive of the Tenth (1929) Edition, they will notice that much of the information is as at December 31st, 1929.

The Institute wishes to point out again that the "standards" used herein are not infallible guides in determining the financial strength or weakness of a municipality. They should be used merely as "indications" of the desirability of more detailed enquiry before arriving at final conclusions. The manner in which taxes are being paid is an important factor in sizing up the situation. That this is true has been illustrated by the fact that the majority of Canadian municipalities which have been in financial difficulties in the past have given warning of conditions through their heavy tax arrears. Some municipalities may exceed the "standards" considerably and still be perfectly sound, and all the elements affecting the financial capacity of the municipality under examination must be kept in mind.

In some Provinces an annual assessor's census based on actual count is required by law. In others individual cities take such a census. It is to be regretted that the practice is not universal. As the standards used herein are necessarily on the per capita basis, estimated population figures introduce an element of possible error, especially if not all estimates are sufficiently conservative. In a very few instances where directory or other estimates have been used as a basis of the city's estimates, the Institute has used its own estimates. The city's estimate, however, is given in a footnote, so that the subscriber, if he so desires, may revise the per capitas accordingly.

The Institute wishes to express its appreciation of the excellent co-operation received from Municipal and School Treasurers and other officials in the supplying of these data. It also wishes to thank its subscribers for their continued support.

x These amounts in some instances are only approximate. They include loans on account of Hydro, Housing, Railways, Storage Dams, Rural Credits, etc.

[1] These are the 1929 figures, per capita of which are in Canadian Tax Conference Report No. 87. They are placed as nearly as possible on a comparable basis and do not coincide exactly with totals in Public Accounts. They do not include capital revenues or expenditures nor those of self-supporting publicly-owned utilities.

[2] Not borne directly by the people of the province. To arrive at the per capita revenue and expenditure from local sources this must be deducted from total per capitas.

[3] Not inclusive of $22,539,958 guarantee for railways controlled by the Dominion Government nor for undetermined contingent liability in respect of advances made by banks to the Canadian Co-operative Wheat Producers Ltd. for grain delivered by the Alberta Wheat Pool.

[4] Includes $24,015,666 guarantee for railways controlled by the Dominion Government but not an indeterminate amount in respect to certain bank loans made to the Canadian Co-operative Wheat Producers Ltd.

[5] Includes $27,392,911 guarantee for railways controlled by the Dominion Government but not an undetermined amount in respect of guarantees of certain advances by banks to the Canadian Co-operative Wheat Producers Ltd.

[6] Of this $40,157,524 is for railways controlled by the Dominion Government; $20,160,000 for the P.G.E. Ry. now controlled by the B.C. Government and against which a sinking fund has been established in connection with guaranteed securities and $5,133,333 for Vancouver and Districts Sewerage Board against which is a sinking fund of $381,168.

[1] Figures as at Dec. 31st, 1930.
[3] This property also liable for taxation by the township village or town within whose limits it lies.
[4] These taxes are levied on the various municipalities within the county, not directly on individuals.
[5] As far as can be ascertained none of these debts are for public utilities.
[6] Area, population and assessment does not include municipalities separate from the county.
[7] Standards used for urban municipalities cannot be applied so figures have not been put on a per capita basis.
[8] Includes $94,000 unsold bonds.
